University of Vavuniya, SL

PROFILE SUMMARY

I'm an ICT undergrad who spends most of his time building actual things. Not just assignments - tools I use, scripts that save me time, apps I wanted to exist. My work ranges from a fully offline AI background remover to a campus management system. I like understanding how things work under the hood and shipping projects that solve real problems.

EDUCATION

B.ICT - Software Technology (Undergraduate)	Expected 2026
Faculty of Technological Studies, Dept. of ICT, University of Vavuniya, Sri Lanka	

TECHNICAL SKILLS

Languages:	Python, JavaScript, HTML & CSS, Java, C++, SQL, Bash
Frameworks/Tools:	Git & GitHub, VS Code, Linux, Android Studio, FFmpeg, Docker
AI / ML:	rembg, Transformers, scikit-learn, Pandas, NumPy
Soft Skills:	Problem Solving, Team Collaboration, Self-Directed Learning

PROJECTS & EXPERIENCE

BG Remover Local	2024
<i>Python AI Offline App</i>	
Local AI background removal. Runs entirely offline using rembg. Drag-and-drop browser UI, packaged for Windows.	
Smart Campus System	2024
<i>Full Stack Database Team</i>	
Replaced spreadsheet-based campus management with a web system covering timetables, rooms, and student records.	
TraceFlow	2024
<i>Android Mobile Local Storage</i>	
Android app for offline workflow tracing. Works fully on-device. Published as APK.	
Automation Scripts	2024
<i>Python Windows Linux</i>	

Two separate automation script suites - Windows and Linux. Temp cleanup, file management, scheduled tasks.

Video Tools Suite

2024

Python | FFmpeg | AI

Short Video Cutter, Video Editor, and AI Story Cleaner - strips silence and filler from recordings automatically.

AI Prompt Image Gallery

2024

HTML/CSS/JS | Supabase | OAuth | Vercel

A collection of AI image prompts and their corresponding output images, making it easy to discover and reuse prompts.
